

 **Castrosua**

**NEW CITY**

N E W

C I

The New City is Castrosua's bet for the urban transport. Modernity, technology, quality and comfort are combined with an innovative aesthetic, which imprints it with a distinguishing character. Not in vain, it received the Red Dot 2015 international design award.

reddot design award  
winner 2015

T Y

WITH ITS OWN PERSONALITY

The detailed exterior design of the New City does not go unnoticed. Its defined lines, inspired in the latest trends of the automobile sector, and its C shaped LED optics, that reinforce the image of our brand Castrosua, give this bodywork a great appearance.

CONQUERING  
THE CITY

Inside its doors, the New City preserves the character of its exterior design. All its space is illuminated with LED ceiling lights, which may be configured according to the passenger's requirements. Likewise, the driver enjoys a place with a studied visibility and a top facets type unit, a latest generation ergonomic seat, an enclosed driver door and exclusive air outlets.

WELCOMING AND COMFORTABLE

NEW  
CITY

We have thought in everything while designing the New City. The passengers will find a mechanic access ramp for passenger with reduced mobility, and also space for baby prams and pushchairs. The door light flashes red during its closure to avoid accidents. And as for maintenance, it is very accessible with its removable front, pivoting corners and access trap doors.

## SERVICE VOCATION

It's not only about transporting passengers; the New City, is thought from the start to fulfil high quality standards, and also to offer practical solutions such as multiple USB connectors, backlighted stop push buttons, bicycle racks, etc. Everything to make the journey a pleasant experience.

INSURED QUALITY
